

SAKHAWAT HOSSAIN

Backend Software Engineer | Laravel, PHP & AWS

Dhaka, Bangladesh | +880 1580-349431 | backend.sakhawat@gmail.com | linkedin.com/in/sajusun | github.com/sajusun

PROFESSIONAL SUMMARY

Backend Software Engineer specializing in PHP and Laravel, with strong experience in designing modular, service-based backend architectures, scalable RESTful APIs, complex business logic, and database-driven applications. Experienced in building and maintaining production systems for international clients, with hands-on expertise in AWS infrastructure and deployment including EC2, S3, Aurora RDS, SES, SSM, OIDC, and Application Load Balancer. Also experienced in full-stack development with React, Next.js, and modern web technologies.

TECHNICAL SKILLS

- **Backend & Architecture:** PHP 8+ (OOP), Laravel (v10/v11/v12), MVC, Modular Architecture, Service-Based Architecture, RESTful API Design & Versioning, SOLID Principles, Design Patterns
- **Frontend & UI:** JavaScript (ES6+), TypeScript, Next.js 15, React.js, Vue.js, Tailwind CSS, Blade, HTML5, CSS3, Responsive Design
- **Real-Time & Caching:** WebSockets, Laravel Reverb, Laravel Echo, Pusher, Redis Caching, Event Broadcasting, Queue Workers
- **Databases & Optimization:** MySQL, PostgreSQL, SQLite, Database Normalization, Indexing, Complex Query Optimization, Eloquent ORM
- **Cloud & DevOps:** AWS (EC2, S3, Aurora RDS, SES, SSM, OIDC, Application Load Balancer), Nginx, Linux CLI, CI/CD, Git/GitHub, Docker
- **Security & Payments:** Laravel Sanctum, JWT, OAuth2, RBAC, Stripe, SSLCommerz, bKash, Automated Webhooks

WORK EXPERIENCE

Laravel / Backend Developer | Softvence IT Ltd

Dec 2025 - Present | Mohakhali, Dhaka, BD

- Design and develop scalable Laravel backend systems using modular and service-based architecture, RESTful APIs, and reusable business logic.
- Develop production-ready web applications, administrative dashboards, CRM workflows, and multi-vendor business modules for international clients.
- Design and optimize database schemas, relationships, indexes, and complex Eloquent/SQL queries, improving backend processing performance by 30%.
- Integrate third-party services, payment gateways, and webhook-based workflows with reliable error handling and retry mechanisms.
- Deploy and maintain production applications on AWS infrastructure, working with EC2, S3, Aurora RDS, SES, SSM, OIDC, and Application Load Balancer.

Jr. Technical Assistant / Software Operations | Edison Industries Ltd

Jan 2024 - Nov 2025 | Savar, Dhaka, BD

- Provided technical troubleshooting and hardware-software system integration for production and engineering lines.
- Developed automated diagnostic scripts and data logging routines to streamline equipment testing workflows.
- Collaborated with cross-functional engineering teams to diagnose system bottlenecks and improve operational turnaround time by 20%.

App Developer (Intern / Trainee) | Kodeeo Ltd

Sept 2023 - Nov 2023 | Uttara, Dhaka, BD

- Designed and documented modular RESTful APIs consumed by mobile (Flutter) and web client applications.
- Engineered real-time notification pipelines and socket broadcasting using Laravel Reverb and Echo.
- Developed role-based multi-guard authentication modules using Laravel Sanctum.
- Collaborated with UI/UX designers to translate Figma prototypes into pixel-perfect, accessible web interfaces.

LIVE & PRODUCTION PROJECTS

- **MyBergo - Multi-Vendor Hotel & Property Booking Engine** (mybergo.com) - Architected a Booking.com-style property management platform where hosts list hotels/accommodations and guests reserve in real time with date-availability locks, seasonal pricing, and host payout dashboards.
- **CruzeHub - Automotive Events, Parts Marketplace & Admin Suite** (cruzehub.com.au) - Engineered the complete enterprise admin dashboard for an Australian automotive community app with vehicle compatibility matching (connecting cars with compatible aftermarket parts) and live socket chat.
- **Organ Sciences - D2C Organic Supplement Subscription Portal** (organ-sciences.vercel.app) - Developed recurring subscription e-commerce portal with Next.js & Laravel, implementing automated recurring billing, subscriber customer portals, and Stripe subscription webhook listeners.
- **CodeStudio Enterprise Workspace** (github.com/sajusun/code-studio) - Created a multi-service showcase platform with private client tracking workspace, live milestone progress, and WebSocket chat.

EDUCATION

Diploma in Computer Science & Technology | Dinajpur Institute of Science & Technology (2019 - 2023)

Higher Secondary Certificate (HSC) - Science | Kader Box Memorial College (2017 - 2019)
